Art Unit: 2622

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. Note MPEP 608.01.

2. Though not warranting a rejection or an objection, the examiner notes that claim 22 depends from claim 2, and that claim 25 depends from claim 12. Applicant may have intended to have these claims depend from later claims.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "little (or "very little") in claim 7 is a relative term which renders the claim indefinite. The term "(very) little" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. What one skilled artisan considers "very little" may differ from what the next skilled artisan considers.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an

Art Unit: 2622

international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Rabinowitz et al.

The digital television broadcasting system of Rabinowitz (noting particularly Figs. 1 and 3) enables identification of respective transmitters among plural transmitters in a distribution system. A Kasami code sequence is inserted in the digitally-formatted DTV signals per respective transmitter (for subsequent identification at the receiving end), thereby forming a composite transmission signal (e.g. col. 22 lines 30-58).

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6. Claims 2-25 appear allowable over the prior art.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor R. Kostak whose telephone number is (571) 272-7348.
